

Bottle Cap Flowers

Supplies for Bottle Cap Flowers

- 7 metal bottle caps per flower
- 1 wooden skewer per flower
- paints (outdoor approved)
- paint brushes
- newspaper
- ModPodge
- hot glue gun

How to Make Bottle Cap Flowers

Learning how to make bottle cap flowers is incredibly simple! For this easy garden craft, arrange the bottle caps as shown to the right. You will need 1 bottle cap in the center and 6 around the outer ring. Place them upside down on a piece of newspaper.

Hot glue all the bottle caps together. Do this gently so they don't all separate before the glue is dried. You may want to do this twice to make sure it is very sturdy.

Hot glue the skewer to the back of the metal flower. Let cool.

Flip over your flower and paint as desired. You could leave these unpainted if you want a more 'natural' look to your garden art! You will need 2 to 3 coats of paint to completely hide the bottle cap.

Once your paint has dried, add a light coat of ModPodge. Let dry.

Place your garden art in the garden and enjoy your easy upcycle craft! You have saved a few pieces of trash from the dump!
