Crystal Candy Canes

Tis the season for candy canes everywhere! Why not grow candy canes you can even hang up as Christmas tree ornaments! This fun Christmas science experiment for kids explores how crystals grow and teaches a little bit about suspension science {chemistry}. Please click the link below

Christmas Snow Globe Experiment

A homemade snow globe is a lesson in viscosity, light refraction, and gravity. You may also be able to sneak in a lesson about vortexes, as well! Please click the link below.

Please take a picture of your completed projects and send to learns@4h.mb.ca so we can share your successes.
